

Hearing and learning go together

Childhood hearing loss carries many negative consequences such as learning difficulties and problems functioning in a social settings. Hearing loss can be treated and regular hearing tests can help identify a problem before it escalates. Hearing screening programs in schools therefore play an important role in securing that students have the best prerequisites for realizing their full potential. Oscilla makes it easy to implement or improve a hearing screening program in school healthcare.

Choose Oscilla for hearing screening in schools:

Ease of use

Oscilla audiometers are so easy to use, they require little training and will easily fit into existing procedures and workflows.

Optimise your workflow

Performing health checks on many students on a daily basis can be a challenge. Oscilla audiometers feature automatic tests making it much simpler for the tester. This saves time and helps increase throughput.

A smart solution for the clinic or on the go

School healthcare professionals often travel to different sites. Oscilla audiometers are compact and designed for daily transportation.
